  - tiefenrausch, liquid sky / cologne
  - dome / lindau
- galerie gonzales / ravenburg
- ... and many more

### history

from 1987-1994 the waz experience performed in the "cosmic scene" between turino/italy, innsbruck/austria and munich/germany. it was during this period that martin wazac aka the waz exp. got involved with the "acid house & headz" movement that started to become popular in austria. in 1997, he relocated to vienna and released tracks on notable labels vienna scientists, musicpark, molar and spray records, as well as, contributed to the compilation series vienna vibrations and the politically motivated classic, electronic resistance. the waz exp. has also worked with artists, mc sultan (now known as dzihan&kamien), sin, martinek and co-founded the dubaware soundsystem, an austrian collective of musicians "containing groovy dub & house feelings, all served with a touch of oriental and unusual instruments". he also remixed "the smoker" available on architekturs debut album "travelogue" on burning bowl records.
